About the Conference

SS Innovations proudly presents the inaugural of the "First Global SSI Multi-Speciality Robotic Surgery Conference (SMRSC) 2024," ushering in a new era of surgical advancement through the advanced, affordable and accessible Robotic Surgical System "SSI Mantra". As a trailblazing Surgical Robotics Research and Development company, SS Innovations is dedicated to excellence in the fields of Urology, General Surgery, Gynecology, Head & Neck and Cardiothoracic surgery.

The conference is taking place on the 19th and 20th of January 2024 at The Leela Ambience Hotel in Gurugram, Haryana, India. SMRSC 2024 promises to be a transformative event with gathering of global medical experts, technological innovators, and visionaries that will explore the future of robotic surgery, with a specific focus on the SSI Mantra Robotic Surgical System.

The conference will feature distinguished National and International Faculty, delving into scientific sessions that discuss the future landscape of robotic surgery globally, integration of Artificial Intelligence in surgery, and the pursuit of sustainable tele-surgery. Live surgeries, conducted by renowned robotic surgeons with SSI Mantra, will showcase the system's practical applications across various surgical specialties including cardiac surgery, providing attendees with real-time insights and valuable learning experiences.

Key themes will include the future of robotic surgery, advancements in the SSI Mantra Surgical Robotic System, Artificial Intelligence in Robotic Surgery, Tele-surgery, and a specific focus on innovations in Robotic Multi Speciality and Cardiac Surgery.

SMRSC 2024 aims to foster collaboration, knowledge exchange, and innovation in the realm of robotic surgery by uniting thought leaders, practitioners, and industry experts. The conference endeavours to set the stage for the future of healthcare with the SSI Mantra Surgical Robotic System.

Join us for this ground breaking event that will shape the trajectory of Robotic Surgery in 2024 and beyond.

Chairman's Message

Dear Friends and Colleagues,

It is with the utmost pleasure that I would like to cordially invite you to join us for our First Global Multi-Specialty Robotic Surgical Conference, which will take place in Gurugram, a city located in the Delhi National Capital Region (NCR). The conference will showcase our SSI Mantra System, that is very advanced technologically, along with being very affordable and accessible. The SSI Mantra System has been placed in over 20 hospitals across the country and abroad, and over 550 multispecialty robotic surgery cases have been done to date, including cardiac surgery.

The live surgeries will include General Surgery, Gynecology, Urology, Thoracic Surgery and Cardiac Surgery. These surgeries will be performed by our distinguished Faculty Members who will be using the SSI Mantra System to demonstrate its performance across a wide spectrum of surgical procedures.

There will be world renowned National and International Faculty who will participate not only moderating various live surgical cases, but also there will be numerous presentations from many surgeons from India who have used our system in specialties across the spectrum, including cardiac surgery.

Delhi NCR is a wonderful place to visit during this time of year. The weather is welcoming, offering pleasant temperatures during the day and cooler at night. There are many attractions that the city has to offer from ancient heritage sites, beautiful walking gardens and many modern museums for art and culture.

You will find this conference to be very productive and educational. A lot will be shared in relation to what we have been able to achieve with the Mantra System, and where we are heading in future. There are various divisions that will be showcased, including our virtual and mixed reality division, what we call SSI Maya. We have advanced at an astronomical rate whereby not only Tele-proctoring and Tele-surgery abilities will be discussed, but also how we will be able to launch robotic programmes utilising these ground breaking technologies.

I also want to take this opportunity to appreciate our team in India. This Mantra System has been completely designed, manufactured and assembled in India, so it is truly India's first indigenous surgical robotic system, now well popularised with the slogan, "Made in India For The World". It is a great accomplishment for the team in India, and we are extremely proud of them. Having demonstrated that this ambitious project was done successfully in India, we can now inspire many others to become involved in innovation because I think it is very important, that as end users, we participate in advancing the field of science as robotic surgery will be the future.

Our conference will be a wonderful opportunity for collaboration that will further enable us to advance the field of robotic surgery, globally.

I would like to extend this warm invitation and am looking forward to welcoming you in India for the SMRSC Conference on January 19-20, 2024 in the Delhi National Capital Region.

Thank you very much.

WHO WILL BENEFIT

The SS Innovations Multispeciality Robotic Surgery Conference (SMRSC) 2024 is designed to benefit a wide range of professionals and stakeholders in the field of robotic surgery.

Potential beneficiaries include:

Surgeons and Medical Professionals: Surgeons specializing in various disciplines, including cardiac surgery and multi-speciality procedures, will gain insights into the latest advancements and techniques in robotic surgery. The event provides a platform for skill enhancement, exposure to innovative technologies, and networking opportunities.

Healthcare Administrators: Professionals involved in healthcare administration can benefit from understanding the potential impact of robotic surgery on hospital operations, resource management, and patient outcomes. Insights gained from the conference will inform strategic decisions related to technology adoption and healthcare delivery.

Researchers and Innovators: Individuals involved in research and development within the field of medical robotics will benefit from exposure to cutting-edge technologies and methodologies. SMRSC may serve as a hub for collaboration, idea exchange, and potential partnerships to drive future innovations in robotic surgery.

Students and Trainees: Medical students, residents, and trainees interested in surgical specialties have the opportunity to learn about the latest advancements in robotic surgery. The conference will provide valuable educational experiences, exposure to real-time surgeries, and networking opportunities with experienced professionals.

Overall, SMRSC aims to foster collaboration, education, and innovation within the field of robotic surgery, benefiting a diverse audience of healthcare professionals, researchers, industry representatives, and ultimately, the patients they serve.

SSi Technologies Experience Zone

SSi Mantra, a cutting-edge, made in India robotic surgery system by SS Innovations, offers an affordable solution for advanced, minimally invasive procedures. Combining state of the art technology with cost-effectiveness, SSi Mantra revolutionizes the field of robotic surgery in India and beyond.

The SSi Mantra System will be available for an interactive experience.
